Reattaching a rubber dishwasher door seal to stainless steel

Canonical: https://www.selleys.com.au/ask-an-expert/sealants/seal-my-dishwasher-door/

Details:

Identify the appliance model and exact replacement seal. Confirm its approved retaining or adhesive method with the appliance supplier.

The older answer names Seal Fix in a 75 g tube. This is a historical product reference, not confirmation of a currently available replacement.

The old Seal Fix link redirects to a general adhesives category, so a matching current specification is not established. Do not substitute an unspecified silicone or transfer the older cure time to another product. A general dishwasher-safe claim does not establish suitability for a moving door gasket exposed to detergent and heat.

Give our team the model, gasket material, mating surface and proposed product name. Confirm preparation, curing and return-to-service instructions and read the exact Australian SDS.

Instructions for this application

Selleys product document or instructions

Need help matching an older product or checking your job? Ask our team with the pack name and code, materials and conditions.

What did Selleys originally recommend for rubber to stainless steel?

Our older answer named Seal Fix in a 75g tube. It does not establish a current equivalent or current availability.

What details do you need to confirm the repair and cure time?

Send us the dishwasher model, rubber type if known, stainless-steel mating surface, retaining arrangement and proposed product name/code. Confirm the method and return-to-service timing with the appliance supplier.

What are the instructions for this application?

Need help matching an older product or checking your job? Ask our team with the pack name and code, materials and conditions. Selleys product document or instructions.

Can any silicone replace the old Seal Fix?

No confirmed equivalence is established. Use the appliance-approved method and exact adhesive.

Can I transfer the old three-day cure time?

No. Follow the confirmed product’s own cure and return-to-service directions.
