Repairing a vinyl pool liner below the waterline

Canonical: https://www.selleys.com.au/ask-an-expert/sealants/vinyl_pool_liner_seal_below_water_line/

Details:

Our answer recommends no Selleys sealant for repairing this liner underwater. Marine Flex expressly excludes flexible vinyl liners and inflatable pools.

The earlier alternative was to lower water below the hole and use a product named Multi Grip for a vinyl patch, curing before refilling. That legacy name does not establish the current formulation. Current Fix & Go Multi Grip excludes underwater use and constant moisture, so do not substitute it.

Confirm an approved kit and repair method with the liner supplier, including water-lowering restrictions. Follow the exact preparation, application, cure and refilling directions and read the matching SDS. No universal patch size or refill time is established here.

Can Marine Flex repair this flexible vinyl liner underwater?

No. Its technical sheet expressly excludes flexible vinyl pool liners and inflatable pools.

Can I use current Fix & Go Multi Grip as the older Multi Grip patch adhesive?

Do not assume equivalence. Current Fix & Go Multi Grip excludes underwater use and constant moisture.

Should I drain the pool before buying a patch kit?

First confirm the liner supplier’s approved repair and water-lowering restrictions. Follow the confirmed system’s curing and refilling instructions.

What are the instructions for this application?

Need help matching an older product or checking your job? Ask our team with the pack name and code, materials and conditions. Selleys product document or instructions; Selleys product document or instructions.

Can current Fix & Go replace the old Multi Grip?

No equivalence is established, and current directions exclude underwater use and constant moisture.
